NRO REVIEW  
COMPLETED

11 October 1963

MEMORANDUM FOR: Committee on Overhead Reconnaissance

SUBJECT: Use of the [ ] in Cuba 25X1D

25X1D

1. At its meeting on 10 October, COMOR was advised that [ ] use. The Committee weighed whether requirements in the Far East or in Cuba demanded its initial use. In the light of the prospects of obtaining more detailed information on our Cuban Targets than can be provided by present high-altitude capability and in the face of the extended time since there has been any low-level reconnaissance, it was concluded to recommend the utilization of this new configuration in Cuba.

2. The Chairman was requested to forward to the JRC the following targets in Cuba:

a. All currently approved, high priority high- and low-level targets;

b. Beach areas defined in COMOR-D-24/81 in the order of priority listed (all if feasible, but a minimum of three); and

c. Targets additional to the above suggested by the member agencies.

3. The specific targets in the categories are listed in the attachment.

25X1D

4. In connection with the discussion of the COMOR, the State representative raised the question [ ] to get more complete information on the economic dislocations and losses incurred in Cuba as a result of the recent hurricane. It was the view of the Committee that, if Operations covered the targets listed in the attached, the disaster areas would necessarily be covered.
